

USER STORIES

- As a user, I can see the campus map so that I understand the campus layout.
 - As a user, I can pan and zoom the map so that I can look at specific areas in detail.
 - As a user, I can select a building on the map so that I can see its details.
 - As a user, I can see building names as labels so that I can identify buildings without tapping each one.
 - As a user, I can recenter the map with one tap so that I don't get lost after panning.
 - As a user, I can see my current location on the map so that I know where I am relative to my destination.
 - As a user, I can switch between illustrated and standard map views so that I can pick the one I read best.
-
- As a user, I can select a building and view its floor layouts so that I can find where things are inside.
 - As a user, I can switch between floors so that I can see each level of a multi-story building.
 - As a user, I can see room numbers on the floor layout so that I can match them to my class.
 - As a user, I can see entrances, stairs, elevators, and restrooms on a layout so that I can orient myself.
 - As a user, I can see a building's hours so that I know if I can get in.
 - As a user, I can see which building entrances are accessible so that I can plan a step-free route.
-
- As a user, I can see POIs on the campus map so that I can find amenities near me.
 - As a user, I can tap a POI to see its name, type, and location details so that I know what it is.
 - As a user, I can filter POIs by category (vending, printers, ATMs, water fountains, etc.) so that I only see what I need.
 - As a user, I can see POIs inside buildings on the floor layout so that I can find them once indoors.
 - As a user, I can see the nearest POI of a given type so that I don't have to search.
 - As a user, I can report a missing or wrong POI so that the data stays accurate.
-
- As a user, I can search for a building by name so that I can find it quickly.
 - As a user, I can search for a room by number (e.g., "HH 316") so that I can find my classroom.
 - As a user, I can search for a POI type so that I can find printers or vending machines.
 - As a user, I can see search suggestions as I type so that I don't need exact spelling.
 - As a user, I can see recent searches so that I can repeat common lookups.
 - As a user, I see a helpful "no results" message with suggestions so that I know what to try next.
 - As a user, I can find results even with typos or abbreviations so that a small mistake doesn't block me.
-
- As a user, I can browse a list of buildings so that I can explore without knowing exact names.
 - As a user, I can expand a building to see its rooms so that I can find a room by browsing.
 - As a user, I can tap a list item to jump to its place on the map so that I can see where it is.

- As a user, I can drag the bottom sheet up or down so that I can balance map and list space.
- As a user, I can favorite a location so that I can get back to it quickly.
- As a user, I can view only my favorites so that my frequent places are easy to reach.
- As a user, I can remove a favorite so that my list stays relevant.
- As a signed-in user, I can have my favorites sync across devices so that I don't set them up again.
- As a Calvin student or staff member, I can sign in with my Calvin ID so that I get personalized features.
- As a visitor, I can continue as a guest so that I can use the app without a Calvin account.
- As a user, I can reset a forgotten password so that I can regain access.
- As a user, I see a clear error when my credentials are wrong so that I know what to fix.
- As a user, I can stay signed in between sessions so that I don't have to log in every time.
- As a user, I can sign out so that my account is safe on a shared device.
- As a user, my session expires after inactivity so that my account stays protected.
- As a user, I can open settings so that I can customize the app.
- As a user, I can choose light or dark mode so that the app is comfortable to view.
- As a user, I can choose units and text size so that the app is easy to read.
- As a user, I can manage location and notification permissions so that I control my privacy.
- As a user, I can see the app's privacy policy so that I know how my data is used.
- As a screen reader user, I can hear meaningful labels for buildings, rooms, and POIs so that I can use the app without sight.
- As a user with low vision, I can increase text size and use high contrast so that content is readable.
- As a user with mobility needs, I can filter for accessible entrances, elevators, and ramps so that I can plan a route I can use.
- As a user, I can complete every task without relying on color alone so that color blindness doesn't block me.
- As a user with limited dexterity, I can hit touch targets that are large enough so that I don't tap the wrong thing.
- As a user, I can still view previously loaded map and building data offline so that poor Wi-Fi in a building doesn't stop me.
- As a user, I see a clear message when I'm offline or data fails to load so that I know what happened.
- As a user, I can retry a failed load so that a temporary error doesn't force me to restart.
- As a user, I see a loading indicator while data loads so that I know the app is working.
- As a user, I'm told when a location's data is missing or incomplete so that I'm not misled.
